What is Electronic Visit Verification (EVV)?

EVV automatically captures information entered at the time of care and electronically verifies:

- Type of service performed
- Individual receiving the service
- Individual providing the service
- Date the service was provided
- Location of service delivery
- Time the service begins and ends

Who is required to implement EVV?

If you are a MO HealthNet provider and offer any of these services, you must implement EVV by January 1, 2020:

- Advanced Personal Care
- Chore
- Consumer-Directed Personal Care
- Homemaker
- In-Home Respite
- Personal Care
- Any of these services reimbursed by a Managed Care Organization

What are the benefits of EVV?

- Reduces errors and fraud
- Eliminates the need for paper time sheets and manual billing
- Reduces labor costs through the elimination of costly paperwork
- Enhances efficiency and transparency of services provided to individuals
- Increases accountability of provider agencies and direct care workers
- Improves quality of care
- Provides accurate verification of service delivery to support payroll functions
