

Monthly Bulletins are your one-stop-shop for all last month's highlights!

Reminders

Completing remediations is a crucial part of the assessment process. It ensures that the case record is up-to-date and supports you in the event of a hearing. Please make sure to complete all remediation tasks when requested.

Ensure that any email containing participant information is encrypted. Sending participant information without encryption is a HIPAA violation. If you are unsure of how to encrypt an email, please review the [Proofpoint Email Encryption Instructions for Providers](#).

Please do not copy the previous year's case note as your new assessment case note. Important details are frequently left unchanged or not updated when this is done, causing the case note, interRAI, and care plan not to align.

Quote of the Month

At this very moment, these are the individuals that only you can reach, and differences only you can make in their lives
