

Nursing Facility Level of Care Assessment

DHSS/COMRU

October 2021

Key Points

- The new process is now automated – the link to complete the application will be located on COMRU's webpage: <https://health.mo.gov/seniors/nursinghomes/pasrr.php>.
- The Nursing Facility Level of Care Assessment (Level of Care Form) replaces the current DA 124 A/B form.
- This new application will be required for any individual seeking admission into a Medicaid certified bed in a nursing facility on or after October 31, 2021.
- The automated system will give the submitter a Return Code that is unique to each individual application. Please ensure the submitter writes down this code as it will be utilized throughout the process.
- The LOC point count has changed from 24 points to 18 points
- The assessment criteria for the Level of Care (LOC) has been changed.
- The assessment criteria correlates with the Minimum Data Set (MDS) in most areas.

➤ Age

The “Individual’s DoB” (Date of Birth) will auto-populate based on the information completed on the Level One Form. The “Individual’s Age” appears automatically.

➤ Points

▪ Determination of preliminary score

- ❖ Assess the individual’s vision, falls status, and current balance problems
Fall risk is not the same as having a current problem with balance.

Which point count (0-3) best portrays the individual – (do not assess age or institutionalization)?

After the preliminary score is obtained, the submitter will assess the age and institutionalization.

Example #1: Yesterday, an 89-year-old individual admitted to the hospital for falls. The individual fell at home and reported they have issues with balance. The individual indicated no previous institutionalization. The individual has no issues with their vision.

The individual would have a preliminary score of 6. Individual is 89-years-old (over 75) and no institutionalization.

The submitter would choose 18 points, based upon a preliminary score of 6 and Age.

Safety:

Example #2 : Yesterday, A 45-year-old individual admitted to the psychiatric hospital for Schizophrenia. The Individual has been residing at a Residential Care Facility (RCF) for 2 years. The individual has no issues with vision. The individual has had no reported falls within the past 90 days nor issues with balance. The individual's record indicates fall risk due to receiving psychotropic medication.

The individual would have a preliminary score of 0. Individual is 45-years-old (under 75) and has been institutionalized (Psychiatric Hospital and RCF).

The submitter would choose 3 points, based upon a preliminary score of 0 and Institutionalization.

Example # 3 – Using Example #2 but changing the individual's age to 76.

The individual would have a preliminary score of 0. Individual is 76-years-old (over 75) and has been institutionalized (Psychiatric Hospital and RCF).

The submitter would choose 6 points, based upon a preliminary score of 0 and Institutionalization and Age.
